

Test Your Avionics Indoors

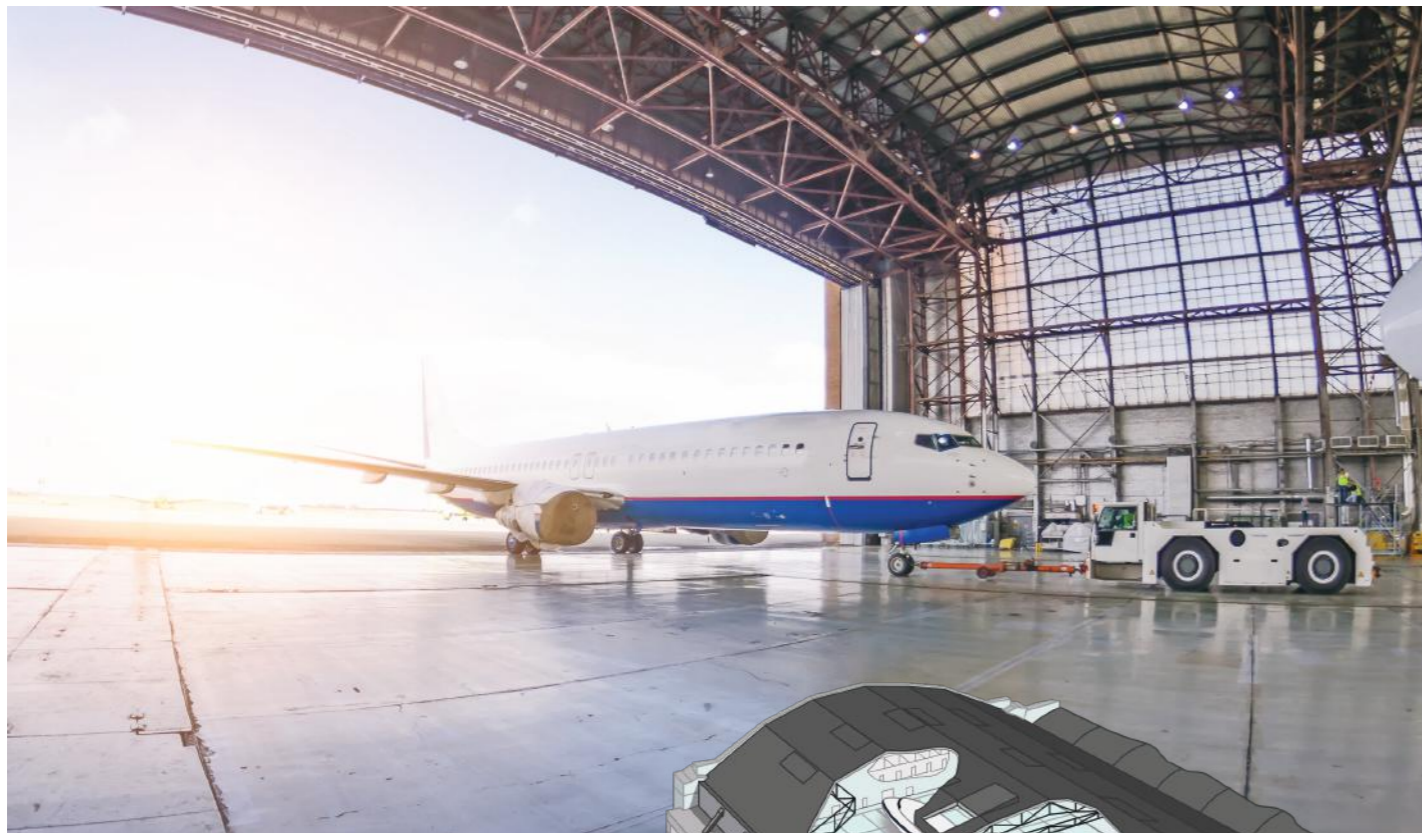

SAVE TIME, MONEY & RESOURCES!

...with Iridium / Inmarsat / GPS Repeater Solutions
BY GLOBAL FOXCOM

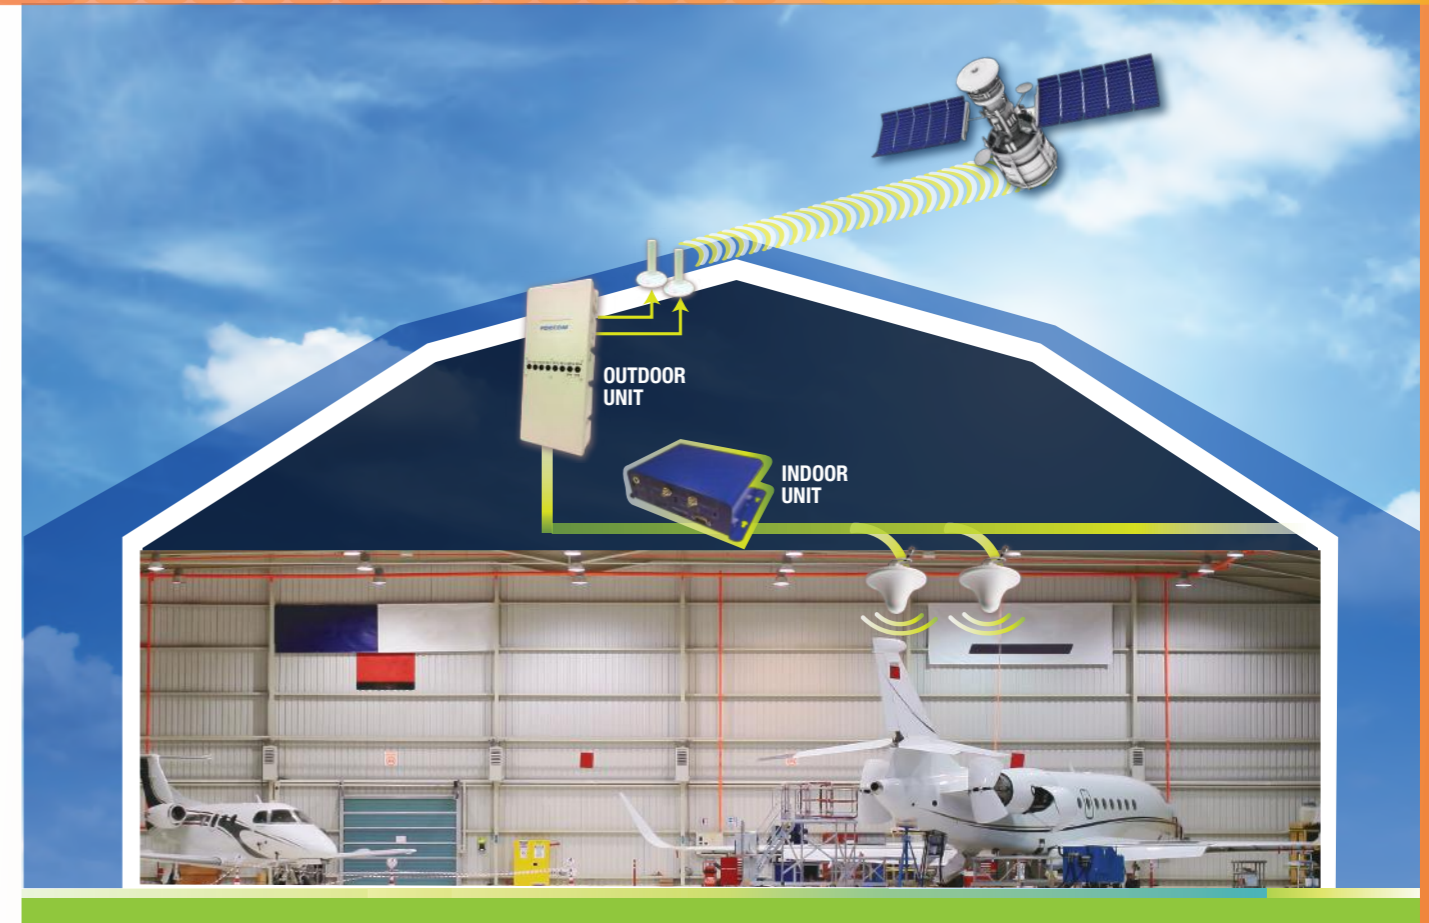

Turnkey MRO Hangar Coverage Solutions

Global Foxcom's Wireless Repeater enables transmission of Iridium, Inmarsat and GPS signals from outdoor to indoor. This solution, which provides satellite coverage to aircraft hangars, saves money because there is no need to take aircraft out of the hangars each time avionics & navigation systems need to be tested.

Advantages of Keeping Your Aircraft Indoors

- ✔ **Save Fuel** – No need to start up the jet
- ✔ **Save Time** – Test the aircraft at any time
- ✔ **Save Manpower** – No need to call in additional personnel to move the aircraft
- ✔ **Save on Utilities** – Minimize heating and cooling costs
- ✔ **Improve Operational Readiness** – Air force bases need to be on alert and ready 24/7

RF Signal Distribution Specialists

Global Foxcom provides seamless indoor coverage by connecting passive outdoor antennas with indoor ceiling antennas. Multiple satellite signals, such as **Iridium**, **Inmarsat** and **GPS L1/ L2/ L5** can be distributed throughout the hangar to multiple aircraft. Outdoor antennas can be placed strategically anywhere within the hangar facility using an optional fiber-optic interface that is easy to install.

Typical Applications

Repeater systems are used in many circumstances where direct satellite transmission signals cannot be received.

- Aircraft Hangars
- Underground Facilities
- Large Buildings
- Military Bunkers
- Submarines
- Ships and Oil Rigs
- Disaster and Emergency Communications

About Global Foxcom

Since its founding in 1993, Global Foxcom has earned the reputation for being the supplier of choice of RF distribution solutions to leading defense, aviation and satcom organizations around the world. Our RF and Optical solutions are deployed worldwide on numerous commercial and military platforms, whether fixed or mobile, airborne or maritime. From DC to 18GHz, Global Foxcom delivers unprecedented performance under the most demanding situations.

The company was acquired in 2014 by the Global Invacom Group, <http://www.globalinvacom.com/> a world-leading, fully-integrated satellite communications equipment provider.
