

RF over Fiber Solutions You Can Count On

Advanced RF / Optical Solutions

Satcom Solutions

Global Foxcom optical links are deployed by major satellite operators and broadcasters around the world. Global Foxcom offers a full range of frequencies, including L, IF, C, X, Ku Band plus 2-18GHz ultra-wideband, as well as a host of accessories, such as CWDM and DWDM.

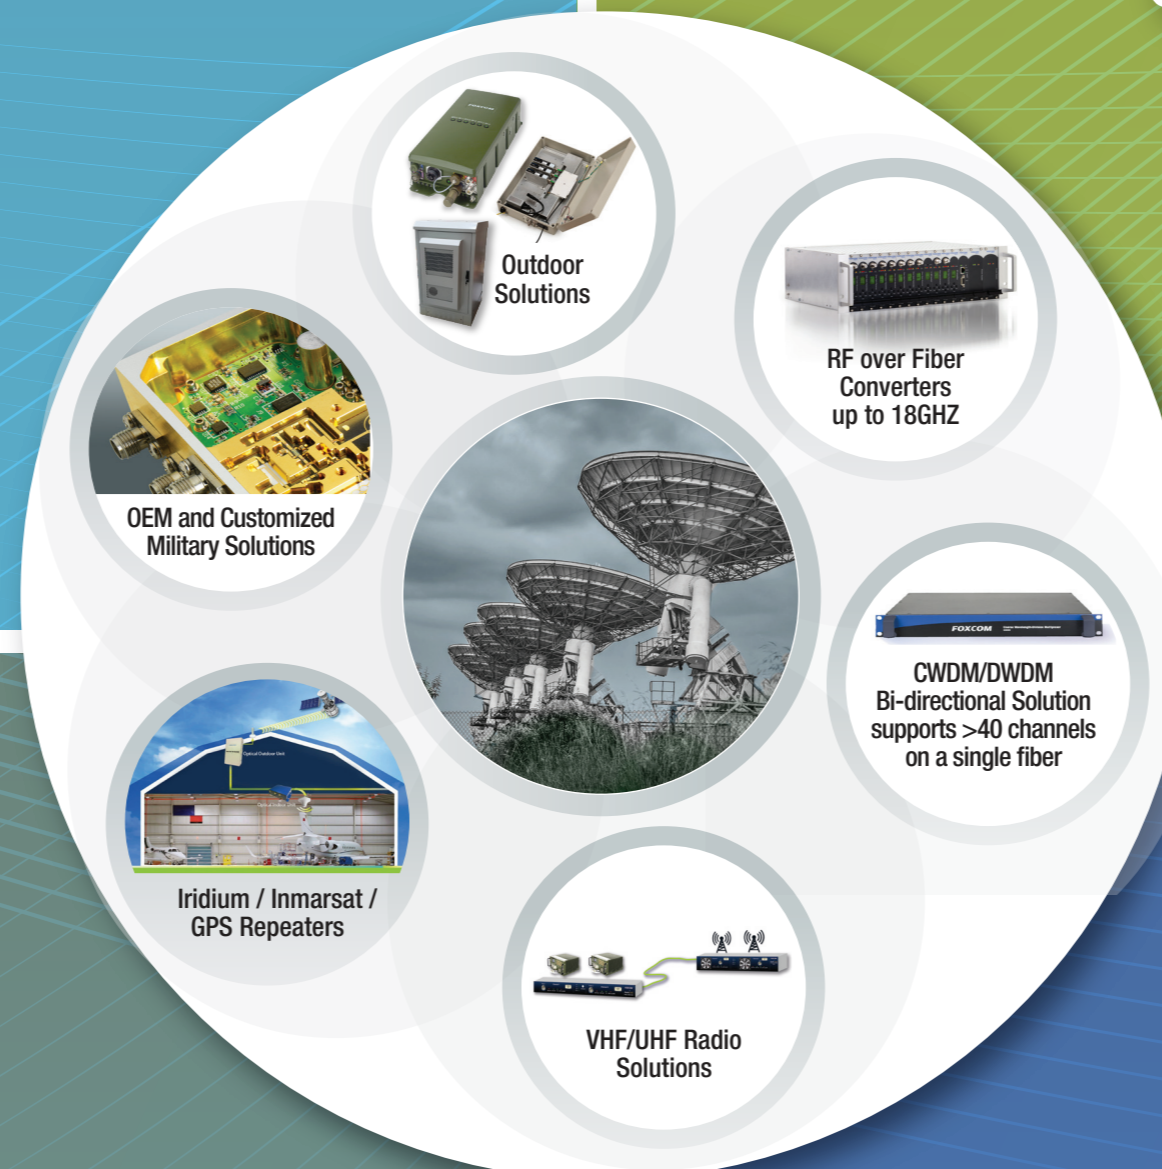

Defense & Security Solutions

Global Foxcom fiber optic links are used around the world on numerous military platforms. Global Foxcom solutions include VHF / UHF Tactical radio optical extenders and repeaters, optical delay lines, high frequency satellite interfacility links and Maritime VSAT solutions.

Inmarsat / Iridium / GPS Solutions

Global Foxcom's pioneering satellite phone repeater solution re-radiates satellite/GPS signals indoors, eliminating the need to step outside a building or underground facility for a clear line of sight. For avionic testing there is no need to take the aircraft out of the hangar, which saves on cost, time and the inconvenience due to inclement weather.

Satellite TV Distribution

Global Foxcom's cost effective solution transmits multiple satellite TV signals to MDUs over a single optic fiber. This compact solution is capable of supporting a variety of satellite television platforms and enables thousands of subscribers to be connected to a single dish.

About Global Foxcom

Since its founding in 1993, Global Foxcom has been recognized worldwide as a leading manufacturer of advanced RF Optical Solutions for the commercial, government and military & defense markets. The company was acquired in 2014 by the Global Invacom Group. <http://www.globalinvacom.com/>

Global Foxcom fiber optic links are deployed around the world on numerous military platforms, whether fixed or mobile, land-based, airborne or maritime. Our capabilities cover DC to 18GHz, delivering unprecedented performance under the most demanding situations. With more than 50,000 links deployed worldwide, Global Foxcom is the supplier of choice for leading satellite operators, defense organizations, integrators and broadcasters.

Building on its strong technological foundation of field-proven RF Optical Solutions, Global Foxcom is an industry leader in product quality, reliability and customer satisfaction.
